**PEM® Type MPP™ Self-clinching microPEM® Pins**

PEM Type MPP, self-clinching microPEM pins are ideal for today’s compact electronic assemblies. Simply pressed into a properly sized mounting hole, these micro pins clinch permanently into place. They can be installed into a variety of sheet materials up to HRB 92 / HB 195 in hardness and they offer excellent corrosion resistance.

**Features and Benefits**

- Satisfy demanding micro positioning and alignment applications.
- Head mounts flush into panels as thin as 0.5mm.
- Chamfered end makes mating hole alignment easy.
- Can be installed into stainless steel sheets.
- Excellent corrosion resistance.
- Can be installed automatically.
- RoHS compliant.

**All dimensions are in millimeters.**

**MATERIAL AND FINISH SPECIFICATIONS**

- **Fastener Material:** Age hardened A286 stainless steel
- **Finish:** Passivated and/or tested per ASTM A380
- **For Use In Sheet Hardness:** HRB 92 / HB 195 or less (2)

(2) HRB - Hardness Rockwell “B” Scale, HB - Hardness Brinell.

**INSTALLATION**

1. Prepare properly sized mounting hole in sheet. Do not perform any secondary operations such as deburring.
2. Insert pin through mounting hole (punch side) of sheet and into anvil hole.
3. With punch and anvil surfaces parallel, apply squeezing force to embed the pin’s head flush in the sheet.

**Requirements for Installation into Stainless Steel**

1. Sheet hardness must be less than the specified limit for the fastener.
2. Panel material should be in the annealed condition.
3. Fastener should be installed in punch side of hole.
4. Mounting hole punch should be kept sharp to minimize work hardening around hole.
5. Maintain the mounting hole punch diameter to no greater than .025mm/.001" over the minimum recommended mounting hole.
6. Fastener should not be installed adjacent to bends or other highly cold-worked areas.

(1) The values reported are averages when all installation specifications and procedures are followed. Variations in mounting hole size, sheet material, and installation procedure will affect this data. Performance testing of this product in your application is recommended. We will be happy to provide samples for this purpose or perform the installation for you.

To be sure that you are getting genuine PEM® brand self-clinching pins, look for the “dimple” trademark. (Reg. Pat. & T.M. Off. of the U.S. and other countries.)
