

Gaming / Recreation

Application: Controller - free gaming and entertainment

Customer: OEM (XYZ Company)

Product(s): YC3-2622 & YSMTSO-27331-ET

Sales: Add estimated sales \$ or pieces for length of project EAU

Installation Method: PS2000 and reflow SMT

Description: The slim form factor of the device requires the PC boards to be tightly stacked. The YC3-26225 standoff (4 per unit) separates the lower left PC board from the metal support chassis. The YSMTSO-27331-ET standoff (2 per unit) allows the lower right PC board to be suspended from the upper board. 1.5 million units/month will be built in 2010
