

(AVAILABLE Q1 2023)

PEM® GHOST™ FASTENERS*

Magnetic Release Fastening Technology.

GHOST™ Fastening Technology is ideal for achieving tight security and sleek aesthetics. This new PEM® capability produces a fully concealed fastener with zero visible evidence of disassembly once engaged.

GHOST™ Fastening Technology At-a-Glance

- Tool-less assembly and reassembly
- Near-instant release and disassembly using magnetic tool
- Non-contact disassembly unlike traditional fastening solutions
- Ample float accommodates tolerance and assembly imprecisions
- Ultra-smooth design for sleek aesthetics
- Concealed nature of the product makes new design avenues possible across a variety of industries and market sectors
- Can replace many small external screw/nut assemblies
- The Ghost™ fastener dimensions are:
 - Body Diameter - .189"/4.8mm
 - Overall Diameter - .214"/5.4mm
 - Length - .130"/3.3mm
- Components are made from 300 Series Stainless Steel

How the Technology Works

PEM® GHOST™ Fastening Technology utilizes a fully concealed, grip-lock mechanism to create a secure lock with zero visible evidence of disassembly once engaged.

Using a magnetic release tool on the concealed fastener actuates the internal components, unlocking the pinch-lock grip and instantly releasing the pin from the fastener.

For technical questions [click here](#).

[The GHOST fastener may not be purchased for use in consumer electronics products. Please contact us if you have any questions.]
