RE: PFAS Compliance

Customers,

This is PennEngineering's official confirmation that our company's products are completely free from Per- and Poly-fluoroalkyl Substances (PFAS). As a responsible and environmentally conscious organization, we understand the growing concerns regarding the presence of PFAS in various consumer products. We are committed to ensuring the safety and well-being of our customers by maintaining strict quality control standards throughout our production process.

At PennEngineering, we prioritize product safety and compliance with relevant regulations and industry standards. PFAS, a group of man-made chemicals commonly found in numerous industrial and consumer applications, has raised significant health and environmental concerns due to its persistence and potential adverse effects.

We understand that the presence of PFAS is a significant concern for consumers, and we share your commitment to protecting human health and the environment. If you require any additional information or have specific inquiries regarding our products or processes, please do not hesitate to contact us. We are more than happy to address any concerns you may have.

Thank you for your trust and continued partnership. We remain dedicated to providing high-quality, PFAS-free products that meet and exceed our customers' expectations

Rocky

A handwritten signature in black ink, appearing to read 'Rocky Pinheiro'.
