

PEM® FASTENING SOLUTIONS FOR PC BOARDS

Reduce Scrap, Handling, and Risk of PC Board Damage

Optimum product performance comes from the secure attachment of your electronic components. PEM® offers a comprehensive line of fastening solutions for use with PC boards to satisfy component-to-board, board-to-board, and board-to-chassis attachment needs.

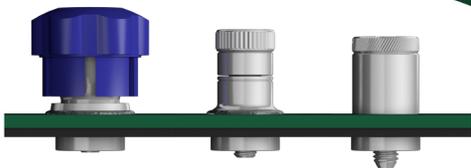

ReelFast® Surface Mount Fasteners

PEM® surface mount technology (SMT) fasteners mount on PC boards and use the same soldering processes as the board's other electronic components.

- Eliminates common productivity and damage issues caused by loose fastening hardware and broaching fasteners
- Supplied in tape-and-reel packaging for easy pick-and-place assembly
- Excellent pullout and torque-out forces

Supplied in tape-and-reel packaging for easy pick-and-place assembly

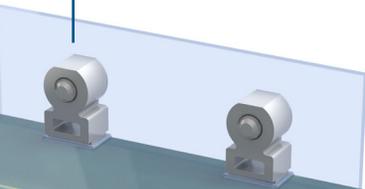

SMTPR™ Panel Fasteners

SMTSK™ KEYHOLE® Standoff.

SMTRA™ R'Angle® Fasteners

SMTPLSM™ Surface Mount Spring-loaded Panel Fastener

SMTSS™ Reelfast® SNAP-TOP® Standoffs

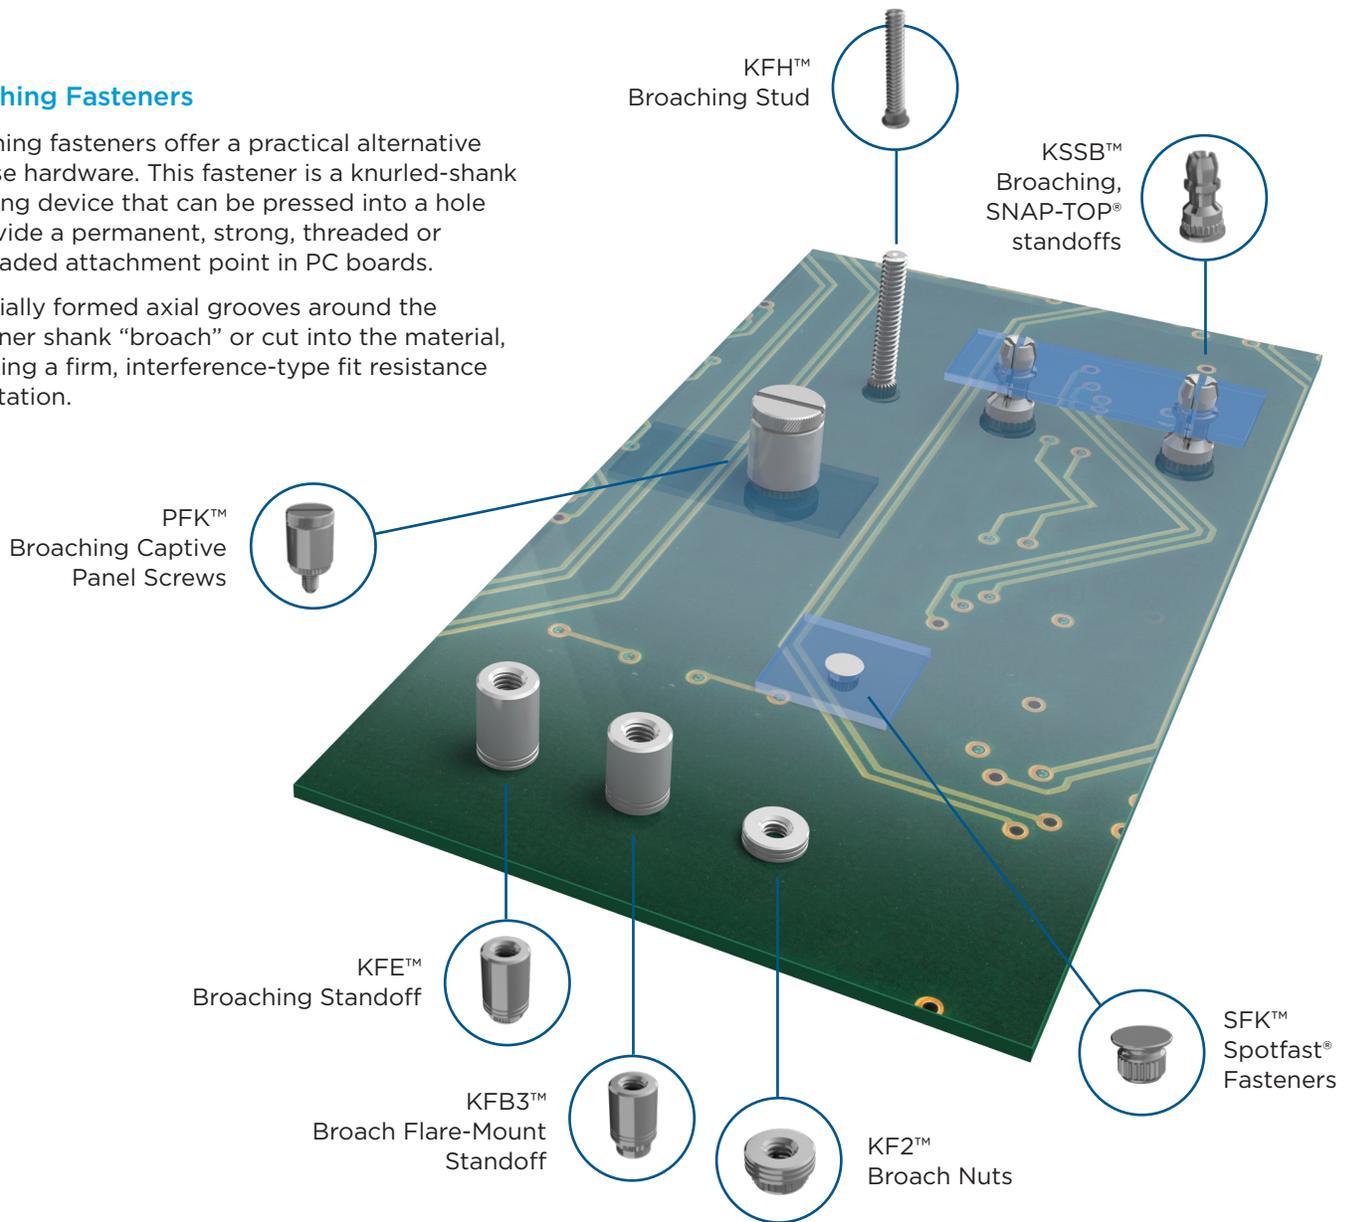

SMTSO™ microPEM® ReelFast® Surface Mount Nuts and Spacers/Standoffs

Broaching Fasteners

Broaching fasteners offer a practical alternative to loose hardware. This fastener is a knurled-shank fastening device that can be pressed into a hole to provide a permanent, strong, threaded or unthreaded attachment point in PC boards.

- Specially formed axial grooves around the fastener shank “broach” or cut into the material, creating a firm, interference-type fit resistance to rotation.

SFK™ Spotfast® Fasteners are designed for flush joining of metal to PCB/plastic panels.
