

PEM® brand SNAP-TOP® standoffs are designed for permanent installation into metal panels or PC Boards

SSA™

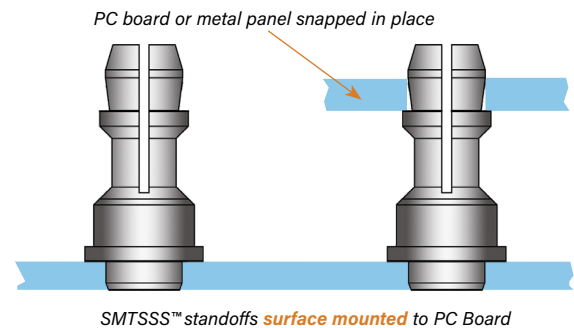

SNAP-TOP® STANDOFFS

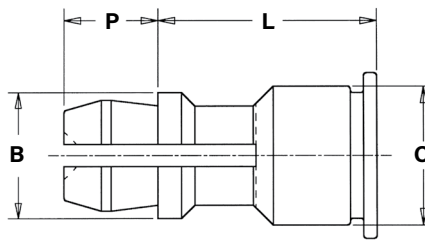

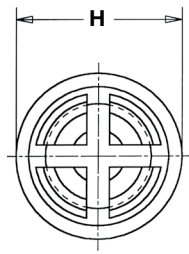

PEM® SNAP-TOP® Standoffs are designed for permanent installation into metal panels or PC boards.

- Spring action to hold PC Boards and subassemblies securely.
- Allows for quick removal.
- Eliminates screws and other threaded hardware.
 - Less parts to handle during assembly.
 - Less risk of damaging delicate circuitry because of loose parts falling into your equipment.
- Available in three different mounting styles:
 - Self-clinching for installation into ductile materials
 - Broaching for installation into PC Board and brittle material.
 - Surface mount for installation to PC Board
- Permanently installed in the panel.

Installation forces, pushout and snap forces are listed on page 7.

SSA™/SSS™/SSC™ STANDOFFS FOR CLINCHING INTO METAL SHEETS

PART NUMBER DESIGNATION

SS	A	-	156	-	10	
SS	S	-	156	-	10	ZI
SS	C	-	156	-	10	
Type	Material		Mounting Hole A Diameter Code		Length Code	Finish Code

FASTENER MATERIAL:

SSA: Aluminum
SSS: Carbon Steel
SSC: 400 Series Stainless Steel

FINISH:

SSA: Natural
SSS: ZI - Zinc plated per ASTM B633, SC1 (5µm), Type III, colorless, plus clear chromate ⁽¹⁾
SSC: Passivated and/or tested per ASTM A380

All dimensions are in inches.

UNIFIED	Type			Panel 2 (Top) Mounting Hole Diameter Code	Length Code "L" ±.005 (Length Code in 32nds of an inch)										B ±.005	C Max.	H ±.005	P ±.005

INSTALLATION

SSA™/SSS™/SSC™ Standoffs

- 1. Prepare properly sized mounting hole in Panel 1 (Bottom).
- 2. Place the fastener through the mounting hole (preferably the punch side) of the panel and into the anvil as shown in the drawing.
- 3. With punch and anvil surfaces parallel, apply only enough squeezing force to embed the head flush with the panel.

KSSB™ Standoffs

- 1. Prepare properly sized mounting hole in Panel 1 (Bottom).
- 2. Place the fastener through the mounting hole of the board and into the anvil as shown in the drawing.
- 3. With punch and anvil surfaces parallel, apply only enough squeezing force to bring the head into contact with the board.

INSTALLATION NOTES

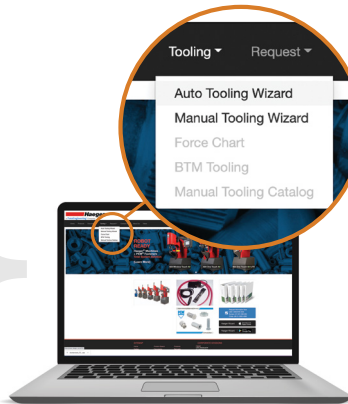

- For best results we recommend using a HAEGER® or PEMSERTER® machine for installation of PEM® self-clinching fasteners. Please check our website for more information.
- Visit the Animation Library on our website to view the installation process [for select products](#).

Stencil	.0067" / 0.17 mm thick

(1) Published installation forces are for general reference. Actual set-up and confirmation of complete installation should be made by observing proper seating of fastener as described in the installation steps. Other performance values reported are averages when all proper installation parameters and procedures are followed. Variations in mounting hole size, sheet material, and installation procedure may affect performance. Performance testing this product in your application is recommended. We will be happy to provide technical assistance and/or samples for this purpose.

(2) With lead-free paste. Average values of 30 test points. The data presented here is for general comparison purposes only. Actual performance is dependent upon application variables. We will be happy to provide samples for you to install. If required, we can also test your installed hardware and provide you with the performance data specific to your application.

All PEM® products meet our stringent quality standards. If you require additional industry or other specific [quality certifications](#), special procedures and/or part numbers are required. Please contact your local sales office or representative for further information.

Regulatory [compliance information](#) is available in Technical Support section of our website. Specifications subject to change without notice. See our website for the most current version of this bulletin.
